General review of foreign commerce of the Philippine Islands for the year ending December, 1911	1
Summary of imports and exports of merchandise, total values and United States, July–December, 1910 and 1911, and the years ending December, 1909, 1910, and 1911	5
Imports and exports of merchandise, total values:	
By countries, July–December, 1910 and 1911, and the years ending December, 1909, 1910, and 1911	6
By ports of entry, July–December, 1910 and 1911, and the years ending December, 1909, 1910, and 1911	7
By leading countries during American occupation, years ending December, 1898 to 1911	7
Carrying trade by vessels and countries, July–December, 1911, and the year ending December, 1911	8, 9
Tonnage movement in the foreign trade, July–December, 1911, and the year ending December, 1911	8, 9
Imports of merchandise by principal classes of commodities and leading countries, years ending December, 1909, 1910, and 1911:	
Animals	10
Breadstuffs	10
Cars, carriages, other vehicles, and parts of	10
Chemicals, drugs, dyes, and medicines	10
Cotton, and manufactures of	10
Fish	10
Fruits and nuts	10
Iron and steel, and manufactures of	10
Leather, and manufactures of	10
Meat and dairy products	10
Mineral oils	10
Paper, and manufactures of	10
Silk, and manufactures of	10
Spirits, wines, and malt liquors	10
Vegetables	10
Wood, and manufactures of	10
Imports of merchandise, by articles and countries, July–December, 1910 and 1911, and the years ending December, 1909, 1910, and 1911. (Index by articles, see p. 105)	11
Exports of merchandise, by articles and countries, July–December, 1910 and 1911, and the years ending December, 1909, 1910, and 1911. (Index by articles, see p. 105)	76
Imports and exports of merchandise, by leading countries and principal articles, July–December, 1910 and 1911, and the years ending December, 1909, 1910, and 1911:	
United States	83
United Kingdom	87
Germany	89
France	90
Spain	92
Italy	93
Austria-Hungary	94
Belgium	94
Netherlands	95
Switzerland	96
China	96
Hongkong	98
Japan	99
British East Indies	100
Dutch East Indies	101
French East Indies	102
Australasia	102
Imports and exports of gold and silver in ore, bullion, and coin, by countries, July–December, 1910 and 1911, and the years ending December, 1909, 1910, and 1911	103
Index to imports and exports of merchandise	105

GENERAL REVIEW OF FOREIGN COMMERCE OF THE PHILIPPINE ISLANDS FOR THE YEAR ENDING DECEMBER 31, 1911.

Philippine customs returns for the calendar year 1911 show imports of merchandise to the total value of $48,024,407. Import values of iron and steel, mineral oils, and rice were materially larger, but there were reduced imports of cattle, breadstuffs, coal, and cotton manufactures, and the import total fell $1,694,954 below that of the high record established in 1910. Exports amounted to $44,587,291 and were $3,958,828 more than in the previous year, with marked increases in sugar and copra to more than offset reduced exports of hemp and cigars. American goods were imported to the value of $19,156,987 and maintained the proportion of 40 per cent established in 1910. Of the increased export total, shipments to the United States were to the slightly increased proportion of 44 per cent and amounted to $19,827,030. In addition there were imports from Hawaii to the value of $387,585 and exports to this island possession amounting to $72,462.

The cotton trade in 1910 surpassed all records and reached a value of over ten million dollars. In the reduced total of 1911 practically all contributors of any importance shared in the reduction except the United States and Japan. Textiles, which comprise the greater part of this trade, declined from $7,013,250 to $6,160,277, but American goods continued to show increased values and represented over half of the reduced total. The introduction of American textiles into the Philippines is one of the most striking results of the establishment of free trade, with the value of these imports in 1908 $535,476 against $3,114,223 in 1911. Prints comprise about 25 per cent of cotton textiles and are for the most part of American origin, as well as the relatively small trade in unbleached goods. In the two leading classes of bleached and dyed textiles the United States furnished slightly less than half of the totals, and these imports by months were fairly constant from foreign countries, but it is to be noted that there was a marked shrinkage in imports of American dyed textiles as well as of prints from both the United States and other sources during the latter half of the year.

In addition to cotton there were imports of miscellaneous textiles to the value of somewhat less than half a million dollars, but though the tariff advantage is generally as high or higher, the United States has made little progress and supplied but a nominal portion, with wool and miscellaneous vegetable-fiber textiles chiefly from the United Kingdom and other European countries, while silks were from China, Japan, and France.

Of imports of cotton for local manufacture, the United States was the source of supply for the raw fiber, as in past years; but in a yarn trade aggregating $776,233 American yarn amounted to only $191, while Japan was the leading source and with the United Kingdom practically controlled the market, notwithstanding a tariff rate of 15 per cent and upward. Cotton thread, however, was imported to the value of $391,456 and under a 25 per cent rate from foreign countries was largely from the United States. Knit goods are a feature of considerable importance in the cotton trade and were imported to a value of $832,741 during the year, chiefly from Spain and Germany, as heretofore, with less than 10 per cent of American origin.

Reduced production of rice throughout the Orient, both in countries dependent chiefly on local supply as well as those figuring prominently as exporters, resulted in practically famine conditions and famine prices. The highest prices ever known were reported from Japan for the months of July and August, and the Government resorted to the reduction of duty and other emergency measures for relief. Though normally a large rice exporting country and the chief source of Philippine supply, the French East Indies found it necessary in September to prohibit further exports with a view to safeguarding local needs, and the same course was adopted in Java. In the latter part of August, Manila market quotations were reported to have reached the highest figure since 1902, in consequence of which the administration made large purchases of foreign rice for local sale in order to meet the situation and succeeded in checking to some extent the upward movement in prices. The quantity imported during the year was actually less than in 1910, and in view of estimates of reduced production the decline in imports from 194,208 long tons to 180,772 indicates the influence of exceptional prices and closed markets on consumption. While the period of extreme prices covered only the latter part of the year, those of the earlier months were also above normal, and the smaller quantity imported in 1911 was at a value of $6,772,247, an increase of $780,912 over the figures of 1910. Of minor but growing importance, wheat flour imports have a direct bearing on the rice trade and presented a reversal of the rice situation in 1911. Lower prices, combined with the rice shortage, resulted in materially increased consumption of flour, and 381,534 barrels were imported against 349,929 in 1910, at a reduction in value from

$1,554,239 to $1,506,858. In the larger quantity for the year American flour fell below those imports in 1910, and Australia supplied over a third of the trade.

The adoption of new and more aggressive measures for the extermination of infectious cattle diseases in the islands found expression in stringent quarantine regulations that had a marked effect on the cattle trade for the year. China, which in earlier years was the chief source of this trade with values ranging above a half million dollars, practically disappeared from it in 1911 with an amount of only $1,030, in consequence of persistent infection from this source of supply. Trial shipments were brought in from Australia toward the middle of 1910, and the success with which the animals stood the long voyage, together with the superior quality of the meat upon slaughter, seemed to indicate that Australian beef cattle were destined to satisfactorily meet the islands' needs as Australian refrigerated meats had already done for a number of years. But in a short time this source was found infected and further imports were prohibited, until toward the middle of 1911, when special provisions were made for slaughter under such conditions as would effectually preclude infection of local animals. Regular importations followed from Australia, which aggregated over seventy thousand dollars in value. With the suppression of the cattle trade with China, French East Indies became the leading source of supply and furnished over 90 per cent of imports in 1911; but here also infection resulted in a temporary embargo and no imports were reported from that country in the months of August and September.

Following upon increased activity in the sugar industry resulting from free trade with the United States, largely increased imports of draft cattle chiefly at Iloilo, the leading sugar port of the islands were a striking feature of the cattle trade during the latter half of 1910, and accounted for the unprecedented value of $1,323,828 recorded in that year. Imports of carabao as well as beef cattle showed a downward trend in 1911, due to some extent to quarantine restrictions, and aggregated a value of $973,151. Closely related to the beef cattle trade and to be considered in connection with it are imports of fresh beef, which in 1911 reached the exceptionally high figure of 12,583,440 pounds. Prices declined sharply during the year and reached a lower import figure than for some time past, with the total for the year valued at $794,018, a sum materially less than that paid for the smaller quantity of 1910.

Active development of the islands is indicated by a further increase in imports of iron and steel. The increase was $619,231, and the value for the year was $6,178,689, of which the United States contributed over two-thirds, while imports form the United Kingdom, Germany, and Belgium, the only other sources of any importance, were slightly less than in 1910. The notable increase for the year was in the machinery group, and imports of sugar machinery point to what is being done in this industry. These imports increased in value from $118,049 to $623,021, of which latter amount $254,374 was credited to the United Kingdom, $153,647 to the United States, and $215,000 to Hawaii, whose prominence in the scientific production of sugar has been attended by the manufacture of equipment that has found favor in the East. The American sewing machine was marketed in the islands to the extent of a quarter of a million dollars and dominated an exceptionally large trade for the year that in the smaller figures of previous years was chiefly German. The American automobile was also much in evidence in the year's returns and constituted $572,852 of the total of $728,102 in these rapidly growing imports, with the French machine its only competitor of any importance. The extension of the railway lines of the islands continues, and imports of rails, ties, locomotives, and cars amounted to about six hundred thousand dollars, with locomotives chiefly from the United Kingdom, rails and cars from the United States, and ties from Australia.

A review of the reduced import total for the year by countries compared with the figures of 1910 shows that the United States, with 40 per cent of the island's import trade, was the heaviest loser, chiefly in the group of breadstuffs. The reduced cotton trade was a leading factor in the smaller totals for the year of the United Kingdom, Switzerland, and Spain, and together with cattle made up the greater part of the heavy loss of China. The volume of French trade was practically the same, while the German was about 10 per cent less. Australia and leading oriental countries except China increased their totals. The Japanese increase was nominal, and rice entered into the larger values of French East Indies, Siam, and British East Indies. The important and growing demand for cement was prominent in the larger total of Hongkong, but with the installation of modern sugar plants for the production of refined sugar and of a cement plant by a local company recently organized, it is to be expected that the two leading industries of the British port will figure less in Philippine imports than in the past.

In the larger export total for the year the most noticeable feature is the declining relative importance of the hemp trade in the face of rapidly increasing values of copra and sugar. Hemp shipments five years ago furnished 60 per cent of all exports, while copra and sugar amounted to but 13 and 14 per cent, respectively. In 1911 hemp was about five million dollars less in value than in 1906 and represented only 33 per cent of the total, while copra was a close second, with 29 per cent, and sugar 25 per cent. In the tobacco industry of 1911 a reduced cigar trade was attended by considerably increased exports of leaf, while other exports of minor importance and miscellaneous character were larger in the aggregate and amounted to about two million dollars.

The export value of hemp reached the lowest figure realized since the disordered industrial conditions of

1900, the average price was the lowest during American occupation, and the quantity exported, though still large compared with that of the earlier years of higher prices, was marked by a further decline from the record established in 1909. The period of extremely low prices dates from the period of exceptionally large output, and with the large output being curtailed by the limit of economic production at current quotations, a reaction in price is to be expected. In fact it is to be noted that notwithstanding the low average for the year, returns for the latter half show improvement in export prices in accord with the better market quotations on lower grades for the same period. Exports of hemp in 1911 amounted to 146,209 long tons, against 160,595 in 1910. The value for the year was $14,520,127, a reduction of $1,955,184 in consequence of the smaller quantity and a decline in the average price per ton from $103 to $99. American and British purchases dominated the market as in previous years, but shipments to the United States again declined and fell below the quantity taken by the United Kingdom.

The conditions in the oil trade of the world that operated highly favorable to copra prices in 1910 continued and resulted in a further increase in the average price per ton from $90 to $93, which, together with a large increase in the quantity marketed, made the year record breaking from every point of view. Approximately one hundred and forty thousand long tons were exported, or more than twenty thousand over the previous high record of 1910, while the value increased from $10,639,049 to $13,019,562. Shipments to France, the leading buyer of previous years, amounted to 60 per cent of the larger quantity, while the United States more than doubled the purchases of 1910, and took second rank in the trade, with a value of $1,378,345.

Exports of sugar for 1911 were characterized by greatly increased quantities and a slight decline in average price. The marketing period of Philippine sugar is such that the higher average world price in 1911 was not realized. The generally high prices that were maintained throughout 1910 until toward the close were coincident with the marketing period, whereas during the marketing period of 1911 the lower closing prices of 1910 generally prevailed and the unprecedented world prices and famine figures during the closing months of the year affected only a small proportion of the production, resulting in an average price of 2.4 cents against 2.7 cents in 1910. The quantity exported, however, exceeded by far that of any previous year under American occupation, and amounted to 205,393 long tons, with a value of $11,040,673, which was $3,816,288 more than in 1910. The largest quantity previously exported in recent years was 142,448 long tons in 1908, which under price conditions prevailing prior to the opening of the American market yielded $5,703,641.

Shipments of sugar to the United States amounted to 184,345 long tons, or 90 per cent of the total. The large China-Hongkong purchases, that were a feature of years preceding free trade, were even more nominal in volume than in 1910; but in consequence of the unusual demand created in the world market by the shortage in the European beet-sugar crop, shipments were made to the United Kingdom in the latter part of the year to the value of $320,500. In the closing years of Spanish rule, and prior to the present development of the European beet-sugar industry, the British market was a constant factor in the Philippine sugar trade; but it has figured only slightly in recent years, and purchases under the extreme market conditions of the closing months of 1911 were the first since 1908.

A marked reduction in the activity of the cigar industry was a feature of 1911. Exports declined from the abnormal value of $2,759,661 in 1910 to $1,901,863, and in the reduction of $857,798 there not only figured reduced American purchases but also a two hundred thousand dollar shrinkage in the foreign trade, of which that of the China-Hongkong market was the most conspicuous. Under the reaction of an overstocked market that followed free trade, exports to the United States averaged only slightly above a million cigars a month during the first quarter, as against nine millions a month during the same quarter of the previous year. In the succeeding months of 1911, however, there was a steady increase, with a total of thirty-eight millions for the year, and the indications point to a normal and growing demand. The higher average price of American purchases that began with July, 1910, was not maintained, and from May until the close of the year the monthly figures were uniformly lower, with an average of $23 per thousand against $28 during the previous 11 months. This is in general accord with amended regulations concerning the shipment of lower grades of cigars under the Government guarantee stamp to the United States.

In the export of unmanufactured tobacco a new high record was established, with a total of 27,656,358 pounds, valued at $1,866,885. The average price of 6¾ cents was somewhat lower than in the past few years. In this exceptionally large trade Spain maintained the marked lead of many years past with a value of $1,224,658, but Austria-Hungary, generally a heavy purchaser, figured in 1911 to only a nominal extent, while Belgium, France, and Netherlands assumed minor importance. A value of only $744 was credited to the United States.

Among minor exports of the islands may be mentioned hats to the value of $440,246. France in years prior to free trade was the chief market for the Philippine hat, and it is stated that imports into the United States were through France, but direct American purchases have increased and amounted to $283,451 in

1911 against a French value of $94,145. This local manufacturing industry shows a healthy annual growth in export importance, with an increase of $161,333 in the total for the year. Maguey fiber was another export to show larger figures and yielded a value of $293,556 in the face of lower prices. Like hemp, it finds its chief market in the United States and the United Kingdom. The shell trade aggregated a value of $277,461 against $227,368 in 1910, and, as heretofore, was exported almost wholly to Singapore. Mother-of-pearl shells represented the greater part of the total, of which only nominal consignments were to the United States. In this connection it is to be noted that the imports of mother-of-pearl shells into the United States amount to about a million dollars annually, and as the bulk of these are from the United Kingdom it seems probable that Philippine shells are reaching the American market through the devious trade channel of the Singapore trader and the British merchant.

FOREIGN COMMERCE OF THE PHILIPPINE ISLANDS.

SUMMARY OF IMPORTS AND EXPORTS OF MERCHANDISE.

[Values given in United States currency. Nondutiable merchandise from the United States imported by supply officers of the army, navy, and insular government, and railway free entries are excluded from the import figures for 1909.]

IMPORTS OF MERCHANDISE.

[Beginning July 1, 1910, imports by articles are based on a new schedule, giving the classification of commodities much more in detail than the schedule in effect prior to that date, and owing to this change it is impossible to make comparisons by articles in some instances.]

EXPORTS OF MERCHANDISE.

[Beginning July 1, 1910, exports by articles are based on a new schedule, giving the classification of commodities much more in detail than the schedule in effect prior to that date, and owing to this change it is impossible to make comparisons by articles in some instances.]

IMPORTS AND EXPORTS OF MERCHANDISE.

BY LEADING COUNTRIES AND PRINCIPAL ARTICLES.

[Beginning July 1, 1910, imports and exports by articles are based on new schedules, giving the classification of commodities much more in detail than the schedules in effect prior to that date, and owing to this change it is impossible to make comparisons by articles in some instances.]
